

Physician Developed

CHELOREX®

Synergistic Oral Chelation Formula

FORMULA DG81P - DIETARY SUPPLEMENT/540 CAPLETS

CHEMICAL FREE
NO EDTA, DMPS or DMSA
FORMULATION

Alan Greenberg, M.D.
Formulator of Chelorex®

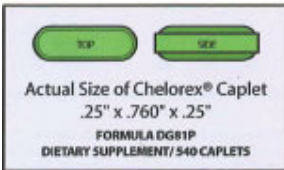

Chelation of toxic heavy metals...
the way **NATURE** intended.

- 4+ Years of Product Testing
- Safe, Flexible and Convenient Dosing
- Reduces Free Radicals and Oxidative Stress†
- Passes Through the Blood Brain Barrier†
- Protects Liver and Kidney Function†
- Shown to Mobilize 16 Heavy Metals†
- Protects Against Heavy Metal Reabsorption†
- Safe For Use With Dental Amalgams in Placet

Science Formulas® Chelorex®

is an oral chelator that was developed based on Alan Greenberg, M.D.'s clinical experience with heavy metal poisoning during his 25 years of medical practice. Chelorex® contains **NO synthetic chelation agents (EDTA, DMPS or DMSA)** which frequently cause adverse side effects. This formulation contains all natural ingredients that enhance the body's natural mechanisms for excreting heavy metals. It contains glutathione precursors that can pass through the blood brain barrier and antioxidants to protect the liver, kidneys, central nervous system and immune function. Chelorex® also has key ingredients that mobilize heavy metals and protect against their reabsorption. Systematic use of Chelorex® (see *sfi_chelorex_protocol_2007_flyer*) leads to safe mobilization and enhanced excretion of heavy metals, correction of deranged trace mineral absorption, distribution and metabolism, but most of all, a healthier you! Chelorex® has been shown to effectively mobilize 16 heavy metals: **Aluminum, Antimony, Arsenic, Beryllium, Bismuth, Cadmium, Lead, Mercury, Nickel, Platinum, Thallium, Thorium, Uranium, Tungsten, Tin and Titanium** with as much as a 99% reduction in certain heavy metals in as little as 45 days†.

About Chelorex® Caplets

The Chelorex® caplet was designed for easy consumption and assimilation. Each tablet has an ethyl alcohol food glaze that allows for complete dissolution in less than 30 minutes at 70° F.

All Science Formulas® products are manufactured in an FDA inspected facility that operates under strict Good Manufacturing Practices (GMP) and has earned the coveted NNFA GMP "A" Rating, Kosher certifications (from all major authorities), as well as certification and approval from Australia's Therapeutic Goods Administration (TGA). All raw ingredients (including cracked cell chlorella for metals) are assayed for purity and strength before manufacture.

Toxic Heavy Metals

negatively impact our health. They are in the air we breathe, the water we drink, the food we eat, the products we use and the objects we touch. Exposure is all but impossible to avoid. Heavy Metals build up within the body over a period of time causing poor health. However, with Chelorex® and its convenient, flexible body weight based dosing*, they can be mobilized and excreted in a safe and effective manner†.

Supplement Facts

Serving Size: 18 Caplets
Servings per Container: 30

	Amount Per Serving	% Daily Value
Vitamin C (as ascorbic acid)	1,000 mg	1,667%
Vitamin E (as d-alpha tocopheryl succinate)	400 IU	1,333%
Magnesium (as magnesium aspartate)	500 mg	125%
Zinc (as zinc citrate)	20 mg	133%
Selenium (as sodium selenite)	200 mcg	286%
Chelorex® Proprietary Blend	6.9 g	*

MSM (Methylsulfonylmethane), Cracked Cell Chlorella, N-Acetyl-L-Cysteine, L-Glutamine, Taurine, Cilantro Leaf Extract and Alpha-Lipoic Acid.

* Daily value not established.

OTHER INGREDIENTS: Dicalcium phosphate, cellulose, croscarmellose sodium, stearic acid, magnesium stearate, silica, and food glaze.

Physician Developed

CHELOREX®

Synergistic Oral Chelation Formula

FORMULA DGB1P • DIETARY SUPPLEMENT/ 540 CAPLETS

Chelorex® Ingredients and Function

Chelorex® was formulated to work synergistically to mobilize toxic heavy metals from within the body and protect the body from heavy metal reabsorption and redistribution. Below is a list of the 12 individual ingredients in the current Chelorex® (DGB1P) formula, along with a brief summary of their functions.

Cilantro (aerial parts from 10:1 extract)

Mobilizes toxic metals from the central nervous system and other tissues.

MSM (methylsulfonylmethane)

Enhances permeability of cell membrane.

Taurine

Enhances biliary excretion, protects CNS, retina and white blood cells.

L-Glutamine

Restores and preserves gastro-intestinal function, enhances hair excretion and is a glutathione precursor.

Vitamin E (as d-alpha-tocopheryl succinate)

Antioxidant and also supports thyroid function.

Magnesium (as magnesium aspartate)

Aids in chelation, replaces lost or chelated magnesium and protects against free radical damage.

Cracked Cell Chlorella algae

Traps toxic metals in GI tract and behaves as ion exchange resin.

Alpha-Lipoic acid

Binds intracellular toxic metals, quenches free radicals and raises glutathione levels.

NAC (N-Acetylcysteine)

Binds toxic metals, raises glutathione levels and acts as an antioxidant.

Vitamin C (as ascorbic acid)

Promotes excretion of toxic metals, is an essential antioxidant and supports thyroid function.

Zinc (as zinc citrate)

Stimulates methionine and reduces toxic metals.

Selenium (as sodium selenite)

Enhances chemical detoxification, reduces toxicity of metals, and is necessary for conversion of T4 to T3 for normal thyroid function.

Chelorex® Product Testing

Over four years of clinical results of 155+ "Trial Subjects" (and counting).

Chart 1* (next column) shows specific toxic metal reduction results for hair, urine & fecal compared to baseline analysis results after consuming 90 doses of Chelorex® (group averages).

Chart 2* is a Provocation or Challenge period demonstrating Chelorex's primary path of excretion of toxic metals at the 14th day of consuming Chelorex®. The data shows Chelorex® to cause the majority of the toxic metals to be eliminated via the gastrointestinal tract, (1280% Increase in fecally eliminated metals). The urinary excretion was much lower (19% Increase in Urine), demonstrating Chelorex® exhibits minimal burden on the kidneys as opposed to most synthetic pharmaceutical chelation protocols.

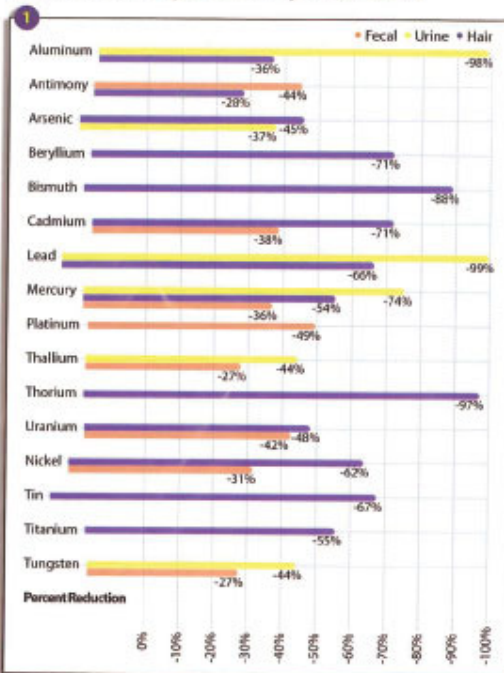

4 Year Study Showing Percentage of Toxic Metal Reduction

After 90 Doses of Chelorex® (90 days @ 1 dose per day or 45 days @ 2 doses per day). Some subjects consumed 90 doses over a longer period of time.

81 Trial Subjects (Pre & Post Hair Analysis), 38 Trial Subjects (Pre & Post Urine Analysis), 36 Trial Subjects (Pre & Post Fecal Analysis).

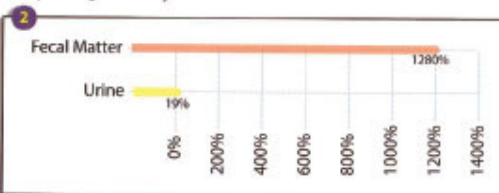

Clinical Testing Performed By: Cell Physics Organization & The Carolina Center for Integrative Medicine

Hair, Fecal & Urine Analysis Performed By: Doctors Data Inc.

Percentage of Toxic Metal Excretion (Provocation)

Group Average @ 14 Days
